# Native Pollinators: Overhead & Underfoot

••• **May 15, 2019 / 5:30 – 6:30 p.m.** •••

CREATE Arts Center, 900 W. 4th Street, Newport, WA

**Guest Speaker: Vicki Green**

WSU Master Gardener

A surprising diversity of animal life is essential for wildland and garden vegetation to prosper and reproduce. Who are these animal pollinators? Where do they live, forage, and nest? What beneficial functions do they provide? How can humans help or harm their survival? Why are certain bees labeled as plasterers, masons, sweats, leafcutters, or cuckoos? And where might you find a bee cocoon? Vicki Green has the answers.
